

Stanzwerkzeuge

### High-tech for everybody...

... perfect rubbering for faster machine running.

High pressure watercut elastomers build the most precise ejection elements. By now we also cut trapezoid profiles – the total quality of the tool will be conclusively improved

### Advantages:

- Progressive spring effect by exact contour fitting trapezoid shape
- lateral force free compression – less nicks – nicks do not tear
- no friction between rubbering and knives – faster ejection
- minimal imprints of the pertinax counters
- optimal operation in alliance with our steel counter plates 20, 35 or 48 HRc

Perfection as a sum of progressive technologies.
